Election/Restrictions

Applicant's election with traverse of VI in Paper No. 7 is acknowledged. The traversal is on the ground(s) that the subject matter of the other groups may be searched with the subject matter of Group VI and hence would not be a burdensome search for the examiner. This is not found persuasive because the members of the groups as outlined in the restriction requirement are so structurally diverse that they cannot be searched together but in fact each require a separate and independent search and hence would place an undue burden on the examiner to search and examine all said groups in a single application.

The requirement is still deemed proper and is therefore made FINAL.

Consequently, the claims were examined solely to the extent in which they read on the elected subject matter of Group VI.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 11-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. "Use" by itself is non-statutory subject matter.

Allowable Subject Matter

Art Unit: 1626

Claims 1-10 are objected to for containing non-elected inventions, but would be allowable if rewritten to include only the examined elected subject matter of Group VI.
